| THE MISSION |

Create a sophisticated and somewhat minimalist space, with a warm, nature-inspired feeling. This bathroom became a more functional, comfortable room in the midst of difficult health circumstances for the homeowner. A frameless shower enclosure with swinging door and grab bars also help the owner stay safe in her home as she ages.

| THE HIGHLIGHTS |

Removal of the dated drop-ceiling revealed beautiful wooden beams. Below, the toe-kick lighting contained within the vanity can be used as a night light or as mood lighting.
